

## DRY BULK MATERIAL HANDLING, PROCESSING & CONTAINMENT

# Real people. Real support. Real results.

GQI is more than an equipment provider — we're a committed partner in dry bulk material handling, processing, and containment. We bridge world-class manufacturers with the specific needs of North American industry, so customers receive not just a product, but a solution that genuinely improves their process.

Every installation is backed by factory-trained people and quick-ship inventory from the Chicago area for the full life of the equipment.

*Dry bulk handling, processing & containment*

### Application first

The equipment meets your material, cut, rate and process — not the other way around.

### Components & systems

A single component, a multi-component order, or a complete line — specified on one record.

### Lifecycle support

Create, improve, maintain — factory-trained service and quick-ship parts behind every install.

### Spec it online

The GQI Configurator walks the application and returns a complete, validated specification.

## Products and solutions

### Screening Machines

Tumbler, vibratory and control screeners for classifying, control, dedusting and wet screening — plus laboratory machines.

### Bulk Bag, Small Bag & Drum Handling

FIBC filling and discharge, bag-dump stations, drum filling, tipping and handling — up to high-containment execution.

### Flexible Fittings & Connections

Sanitary, pull-ring, band-clamp and flanged connections in any geometry — engineered to the interface, not sized to a diameter.

### Flow Promotion

Ultrasonics, vibrators, impact hammers, lump breakers, agitators, bin activators, air pads and live-bottom cones.

### Pneumatic Convey Components

Airlocks, slide gates and diverters, cyclones and filter receivers, screw pumps, pick-ups and blower packages.

### Aftermarket Parts

OEM spares direct from our brand partners, motors, seals, gaskets and wear parts — with US-based inventory.

### Replacement Screens & Rescreens

Replacement screens and rescreening for GKM and most other screener makes, in the mesh and frame you actually run.

### Services

Consultation and design, commissioning, process evaluation, preventative maintenance, OEM repair, overhauls and rebuilds.

## BRAND PARTNERS, CONFIGURATOR &amp; REFERENCE TOOLS

## Trusted partners. Proven technology.

GKM Siebtechnik is a global manufacturer specializing in precision screening equipment for dry bulk classification and separation. GQI serves as GKM's North American partner, delivering local application expertise, replacement screens, and aftermarket support.

Hecht Technologie is a global manufacturer of containment solutions, dry material handling, and powder sampling systems for sensitive processing environments. GQI represents Hecht where operator safety and dust control are critical.

Filcoflex manufactures custom-engineered flexible connections that maintain process integrity between conveyors, screeners, feeders, and other equipment. GQI supplies Filcoflex solutions as complete system packages and standalone replacements.

Artech Ultrasonic Systems manufactures ultrasonic flow-aid technology that prevents material hang-up and bridging in hoppers, chutes, and screening equipment. GQI delivers Artech solutions throughout North America.

### Free reference tools — no sign-up, no download

Calculators and index tools built for the daily work of dry bulk processing, plus the GQI Configurator: guided selection from application to a complete, validated specification you can send straight to our team.
