

OEM SPARES, MOTORS, SEALS, GASKETS & WEAR PARTS

All the parts. One source.

When a machine is down, the missing part is the production-schedule priority. GQI is one source for keeping the equipment we sell — and some equipment we didn't — running: OEM spares direct from our brand partners, OEM equivalents, and handy upgrades, with US-based inventory from motors to clamps and more.

We source OEM parts directly from our brand partners — GKM, HECHT, Artech, and Filcoflex — and can supply the original documentation, manuals, and drawings that go with their machines. For other brands, we'll do our best to source and support them too, typically as non-OEM supply. Identify the machine, describe the part or the service, and GQI quotes it.

OEM spares, staged in US-based inventory

OEM, direct

Genuine spares from GKM, HECHT, Artech & Filcoflex — with the original documentation.

Most makers supported

Other brands sourced and supported too, typically as non-OEM supply.

US-based inventory

From motors to clamps and more, stocked stateside for shorter downtime.

Parts & service together

Commissioning, maintenance, overhaul / refit, on-site repair & remeshing in the same request.

What's covered

OEM Machine Spares

Genuine spares for GKM screeners, HECHT bulk-bag and containment systems, Artech ultrasonic equipment, and Filcoflex connections — matched from your part numbers, serial number, or the original documentation.

Motors

Replacement motors for supported equipment — identified from the machine nameplate and matched to the original build.

Ultrasonic Transducers & Components

Generators, transducers (converters), and shielded HF cables for ultrasonic screening and flow-promotion systems.

Clamps, Ferrules & Gaskets

Single-pin, wing-nut, and bolted heavy-duty clamps with matching ferrule pairs, FDA gaskets in EPDM, silicone, and PTFE, hose and band clamps, ground studs, and air-regulator kits.

Wear Parts for Connections

Replacement clamps, gaskets, and wear parts for flexible connections already in service — keep the sleeve, replace what wears.

Process Monitoring

Monitoring components for the equipment we support — scoped with GQI engineering against your machine and process.

Machine down? Start with a photo.

Innovative Solutions. Reliable Support. Always a Step Ahead.

FAST IDENTIFICATION

A nameplate photo is enough to start.

The more you have, the faster GQI can quote — but don't wait for a complete list. Down right now? Email a photo of the machine nameplate and the part — or the failed part itself — and we'll identify it, source it, and quote it. Tell us the line is waiting.

What to Send

Machine / model type (e.g. "KTS 1200 tumbler screener"), the project or serial number from the nameplate, a part description with any OEM part numbers and quantities — and if the machine is down, the symptoms and when you need it.

Service, in the Same Request

Commissioning, maintenance contracts, optimization, overhaul / refit, on-site repair, and remeshing — requested in the same RFQ as the parts. Lost the manual? For partner machines, we can supply it.

Cleaning balls & ball tray

Replacement vibratory motor

Ultrasonic transducer (converter)

Flexible connection & clamps

Brand-partner led

We source OEM parts directly from our brand partners — and for any other manufacturer, GQI services most makers.

GKM · screening machines & screens

HECHT · bulk-bag & containment

Artech · ultrasonic flow promotion

Filcoflex · flexible connections

Other makers · non-OEM supply

Screens have programs of their own. Replacement screens & rescreens — for GKM and most other screener makes — and Filcoflex flexible fittings & connections are full GQI product lines in their own right. Ask for the matching overview, or start either request at configurator.gqind.com.

From nameplate to quote

1 Identify the machine

Nameplate photo, serial number, or the original documentation — whatever you have.

2 GQI identifies & sources

OEM direct from brand partners; most other makers as non-OEM supply.

3 Quoted & delivered

Parts, service, or both — quoted as one request.
